## POLITICS GOES POP!

The world seems like a strange place right now...with the rise of rebellion and the fight for freedom of speech, even our favourite artists get political in the wake of the new world order.

Whatever your view, celebrate music as art, revolution and life! Long Live Rock n' Roll... And with that in mind, **GREEN DAY** have recently earned their 3<sup>rd</sup> number 1 Album on Billboard 200 Chart with Revolution Radio. They're currently on their world tour and have made clear their protests in a recent gig at the American Music Awards. American Idiot anyone?

Right on Sister. As well as this, Gorillaz have recently released a new single 'Hallelujah Money' featuring Benjamin Clemantine. Like Green Day, this release was about the worship of money and the dark influence of corporations on politics. Gorillaz have a lot to say this year, and we're listening.
